

Home Theatre Ranges

IMMACULATE FINISH

Swan Speakers pride themselves on their high end luxurious finishes which are available across the entire range.

BUILT TO LAST

The entire range is constructed from high quality variable density board which is the industry standard for high performance sound. Higher end models have intricate cross bracing structures to reduce resonances to virtually undetectable levels.

SWAN DRIVERS

Unlike most brands, Swan is one of the few remaining companies who still make their own drivers. In fact, one entire factory is set up solely to produce drivers from the basic range right up to the reference products.

Swan RM600F

- Floorstanding speakers range from \$1,000 per pair up to \$12,000 per pair.
- Flat panel monitors to suit plasma or LCD TVs are \$750 each and have 7 optional grill colours to match your décor.
- Bookshelf speakers range from entry level through to true reference grade monitors up to \$2,500 per pair.

Swan Sub10

Swan Sub10D

Swan have a strong pedigree in high end audio dating back nearly 20 years. This shows through their immaculately designed and built products, with huge attention to detail and stunning finishes. And the sound? You won't find another speaker which can compete at any of our price points. We invite you to compare. For peace of mind, Swan speakers are covered by a full 10 year warranty, subwoofers are covered for 3 years.

Swan V8

Let the experience of our years of learning benefit you in your home today.

DISTRIBUTION

VX RANGE

Swan VX basic speakers feature polyamide cutout switches which reset if the speakers are overdriven. They also have switchable bass and treble loading and pivoting tweeters.

VR RANGE

The VR range has all the features above plus layered Nomex "Stratum" fiberglass cones for smooth and responsive lower end frequencies.

VA RANGE

Swan's highly weather resistant outdoor speakers. Made with durable ABS housings, they feature aluminum grills, fixtures, tweeters and woofers.
