

SWANS DIVA HOME THEATRE RANGE

“The 6.2 at this price is untouchable by any speaker out there in this and sub-\$4000 range. Sound-stage is huge, mids are clean, bass is tight and highs crystal clear...” Diva 6.2F owner

The Divas are well-named — stunners to look at, breathtaking to hear. Cabinet finish is exquisite. Bottom and top caps are finished in a piano-black lacquer, while the graceful curving side panels are clad in a rich dark veneer covered in multiple coats of clear piano lacquer hand polished to a deep luxurious finish. They're also available in piano lacquer top to bottom.

Externally-mounted wide-band dome tweeters bring a thrilling sense of spaciousness to music playback, while robust extended midrange is supported by a tandem pair of woofers with seamless, hand-back-damped cones producing an abundance of clean, articulate bass.

The Swans Diva range includes three main speaker options — a solution for every situation.

The matching Diva centre speakers ensure a seamless front-stage image, while the Diva rear speakers are works of art, a bipole design creating all-enveloping rear sound effects.

The Swans Divas are guaranteed to please — exceptionally impressive speakers that everyone will love. Swans are available in Australia through Oceanic Distribution.

CASATUNES

WHERE MULTI-ROOM AUDIO AND THE PC MEET

Want music throughout your home or office? CasaTunes, now available in Australia through Oceanic Distribution, delivers up to 9 sources of music to up to 48 rooms!

With CasaTunes you can experience content-rich, menu-driven selection of sources that can include internet radio, iPods, a media player or music stored on your PC's hard drive, or just about any external audio device (CD player, DAB+ radio, etc). The system is so smart that it can even play multiple tracks from your hard drive or iPod simultaneously, all with cover art.

Any computer on your home network can use a web browser to select songs in any room. Install keypads for easy access in rooms without a computer. The keypads show full track details, and can be finished in a broad range of styles. Or use the newly-released iPhone/iPod touch interface! Connectivity is another bonus. The system can interface directly with Nuvo and Russound systems.

Software-only solutions start at just \$799.

Contact Oceanic Distribution for dealer information and trial versions.
